

SMART BURNER™

LOOK SMART. COOK SMART. SAVE SMART.

PTI STB ZA (2 large, 2 small)
PTI STB ZB (3 large, 1 small)

Upgrade old electric coils
in seconds with
state of the art technology

SMARTBURNER™ COOKS YOUR FOOD NOT YOUR HOME

THE PROBLEM

Cooking fires are the #1 cause of household fire in North America.

Electric coils:

- Reach temperatures as high as 1652°F (900°C)
(Water boils at 212°F (100°C))
- Waste energy
- Warp pots and pans

A home fire is reported every 85 seconds.

THE SOLUTION

SmartBurner™

An elegant, state -of-the-art transformation of the electric coil stove that looks better, cooks better and saves better. It also protects families and their homes from the leading cause of household fires... cooking.

HOW IT WORKS

SmartBurner™ has temperature limiting control technology which prevents the burners from reaching the temperature at which most common cooking oils and food items auto ignite into fire.

SMARTBURNER™

- Protects tenants and properties
- Installs in seconds
- Transforms and updates the electric coil stove
- Helps prevent cooking fires
- Provides a larger, more efficient cooking surface
- Delivers a superior cooking experience
- Saves money and energy

SMARTBURNER™ - LOOK SMART. COOK SMART. SAVE SMART.

PROVEN TECHNOLOGY

SmartBurner™ is the easy to install version of Safe T Element™, the commercial product that has been protecting multi-residential buildings, colleges, universities, seniors homes and military bases since 2007. With more than 150,000 units already sold not a single cooking fire has been reported.

SmartBurner™ is a patented replacement for electric coil elements that looks smart, cooks smart and saves smart. This product comes with a one-year warranty against manufacturing defects and was proudly designed and engineered in North America.

LOOK SMART

Transforms the electric coil stove top in seconds. Makes clean up a breeze. No longer does food fall between flimsy electric coils. Replaces those coils with solid cast iron electric plates.

COOK SMART

Utilizing a larger cooking surface, SmartBurner™ offers a better cooking platform. Even cooking heat ensures that food cooks evenly too.

SAVE SMART

SmartBurner™ uses less energy to cook food than coil elements. By cutting the risk of cooking fires it also helps reduce insurance claims and any repair costs from smoke or fire damage resulting from cooking fires. And because SmartBurner™ doesn't reach the excessive temperatures coil elements do, there is much less damage to pots and pans.
